

Is your Business protected from **Credit Card Theft?**

You've seen the headlines. Card data security breaches at DSW and Ralph Lauren spotlight merchants' liability if sensitive cardholder data is compromised. The card associations levy fines from \$100,000 to \$500,000.

If a data loss from your business location is suspected, you, the merchant, are liable for any loss of card data from your POS system.

- The card brands conduct a forensic audit
- Fines will be assessed if the auditors determine you were storing data inappropriately.
- Fines can exceed \$100,000

Protect Yourself

- Upgrade to the latest PCI DSS-compliant software
- Make sure your processor is PCI DSS-compliant

Mercury Supports the Payment Card Industry Data Security Standards (PCI DSS)

- Mercury is audited annually to ensure PCI compliance
- Mercury is an industry leader in promoting transaction processing security awareness
- Mercury works with POS developers to ensure their systems have PCI-compliant versions that do not store prohibited data and truncate or delete data

Combining PCI-compliant POS software with Mercury Payment Systems' processing provides swipe-to-settlement security for all your credit and debit card transactions. Make sure you have the end-to-end solution that will keep you out of the headlines and in business!
